Sulphonylureas
Metformin
Meglitinide Derivatives
GLP-1 agonists
DPP-4 inhibitors
TZDs
SGLT-2 inhibitors
α-glucosidase inhibitors
Meglitinide Derivatives
Amylinomimetics
Bromocriptine
Colesevelam
Sibutramine
Selotrelan Europharm

Glucose Monitoring

1920s  30s  40s  50s  60s  70s  80s  90s  2000s  2010 to present

Sulfonylureas
Metformin
Meglitinide Derivatives
GLP-1 agonists
DPP-4 inhibitors
TZDs
SGLT-2 inhibitors
α-glucosidase inhibitors
Meglitinide Derivatives
Amylinomimetics
Bromocriptine
Colesevelam
Sibutramine
Selotrelan Europharm
Insulin Pumps

1920s  30s  40s  50s  60s  70s  80s  90s  2000s  2010 to present

Diabetes: The Here and Now

- ~30 million Americans have diabetes (9.4%)
- ~84 million Americans have prediabetes

From the CDC:
- Worldwide: 108 M → 422 M
  1980  2014

- People with diabetes live longer now.

Diabetes: The Here and Now

- People with diabetes today can live a full life.
- Children can participate in school activities.
- Adults can participate in work activities.
- Healthier and happier pregnancies and children.
- Lifestyle still plays a role for ALL types of diabetes: weight, nutrition, exercise.
